TAIGR

AI TRANSLATION TAILORED TO YOUR ORGANIZATION

The next generation of machine translation is **TAIGR**: an AI tool that integrates your linguistic preferences. Compatible with any application, this revolutionary innovation in professional translation combs through your previous translations, glossaries, and style guides to generate tailored results.

TAIGR is endlessly flexible, allowing you to fine-tune its output. Don't like its first suggestion? Simply tell **TAIGR** what you'd like it to do differently.

TAIGR can also offer multiple variations on a sentence or paragraph, letting you choose the final version. It's light years ahead of neural machine translation, which always translates the same way.

With **TAIGR**, you have full creative and editorial control over your translations. Your expertise remains central to the process, supported by the accuracy and efficiency of artificial intelligence. It's the perfect marriage of technology and human know-how.

ARTIFICIAL INTELLIGENCE IN SERVICE OF HUMAN INTELLIGENCE

TAIGR's intelligence pushes the boundaries of automatic translation. It instantly analyzes your LogiTerm modules to mimic the style and tone of past translations. It also draws from your bitexts, specialized vocabulary, and unilingual documents to insert accurate and context-specific terminology.

TAIGR is a paradigm shift from past machine translation engines, which are generic and overly literal. It can propose one or more high-quality drafts that respect your style guidelines. That's where your expertise as a translator comes in: choose the best option, refine it to accurately convey each nuance, and transform it into elegant text that matches the original version—or makes it even better!

REVOLUTIONARY AUTOMATION — WORK FASTER AND MORE EFFICIENTLY

When paired with AlignFactory Robot, **TAIGR** can automatically update its knowledge of your archives. This cutting-edge system analyzes

ADVANTAGES

- INTEGRATES SEAMLESSLY WITH LOGITERM
- WORKS IMMEDIATELY WITH NO TRAINING PHASE
- AUTOMATICALLY FOLLOWS YOUR TERMINOLOGY AND STYLE
- CAN GENERATE MULTIPLE DRAFTS IN DIFFERENT STYLES AND TONES
- FULLY COMPATIBLE WITH ALL LARGE LANGUAGE MODELS
- HOSTED WITH A TRUSTED PROVIDER OR KEPT ON PREMISE WITH TAIGR VAULT
- COMPATIBLE WITH ANY APPLICATION VIA THE TAIGR PLUGIN
- MANAGES LARGE PROJECTS EFFICIENTLY WITH LOGITRANS
- TOTAL AUTOMATION OF ARCHIVE MANAGEMENT WITH ALIGNFACTORY

and synchronizes your bilingual documents as soon as they are created. Your new translations instantly power **TAIGR**, which puts them to use immediately to improve its performance.

THE TAIGR PLUGIN: ACCESS THE POWER OF TAIGR FROM ANY APPLICATION

The **TAIGR** Plugin makes **TAIGR** accessible from any application in Windows. Simply select the text you wish to translate and hit Ctrl twice, and your translation will pop up in the plugin interface. You can also use the plugin to access neural machine translation engines, online resources, and all your LogiTerm modules. **TAIGR** adapts to your needs and integrates new technologies as they develop.

This versatile tool goes beyond simply translating. It converts speech to text and text to speech—and even extracts text from images. It can be used to query AI on a variety of topics, acting as dictionary, thesaurus, writing assistant, and research tool. With **TAIGR**, the sky is the limit!

USER-FRIENDLY AND READY TO GO

TAIGR radically simplifies your translation ecosystem. It takes just minutes to pair with LogiTerm, without the need for complex server installation. This agile solution integrates seamlessly with your workflow, eliminating technical constraints and time-consuming maintenance.

TAIGR frees translators from traditional, cumbersome CAT software. The days of sentence-by-sentence grids, incessant updates, and high costs are over. What's more, you'll never need to export or clean up TMX files again. **TAIGR** takes a user-friendly and fully automated approach.

Unlike neural machine translation, **TAIGR**'s AI agent requires no training phase. It's the ultimate plug-and-play solution.

TAIGR

THE GOLD STANDARD IN CONFIDENTIALITY AND SECURITY

With **TAIGR**, your confidential information is protected. Keep your AI on premise with TAIGR Vault for total control over your data or opt for hosting on trusted external servers. Either way, your sensitive files stay private.

TRANSLATE A SINGLE SENTENCE OR MULTIPLE DOCUMENTS AT ONCE

While the **TAIGR** Plugin is ideal for short translations, **TAIGR** also integrates with LogiTrans, the LogiTerm pretranslation module, to translate several documents at once. What's more, multiple translators can collaborate on the same document in SharePoint. Infinitely flexible, **TAIGR** adapts to your needs—not the other way around.

AI ACCESS FOR REQUESTORS

Pairing **TAIGR** with BridgeTerm, Terminotix's workflow management solution, gives your clients access to a translation portal that draws on their organization's resources to deliver specific, accurate and secure translations on the fly. The portal even saves the original document so that human translators can access it for revision.

CHOOSE YOUR PREFERRED AI AGENT

TAIGR gives you the freedom to choose the AI agent you want. Simply select the technology that meets your needs and confidentiality requirements and configure it easily with **TAIGR**.

ARE YOU READY TO TAKE YOUR TRANSLATIONS TO NEW HEIGHTS?

TAIGR is your partner! Transform the way you work and discover the power of artificial intelligence tailored to your organization!

Plugin Terminotix - AI: Traduction sans RAG

Although the capital gains tax hike has been delayed, several related measures are proceeding as planned, including key exemptions and new thresholds. These changes are designed to support Canadians and encourage investment while maintaining tax benefits for certain real estate transactions and small businesses, the government says.

NMT   LogiTerm   AI

Version 1 (directe) :

Bien que la hausse de l'impôt sur les gains en capital ait été reportée, plusieurs mesures connexes se poursuivent comme prévu, y compris des exemptions clés et de nouveaux seuils. Ces changements sont conçus pour soutenir les Canadiens et encourager l'investissement tout en maintenant les avantages fiscaux pour certaines transactions immobilières et petites entreprises, selon le gouvernement.

Version 2 (stylisée) :

Le gouvernement a reporté la hausse de l'impôt sur les gains en capital, mais maintient plusieurs mesures associées, notamment les exemptions majeures et les nouveaux seuils. Il affirme que ces ajustements visent à dynamiser l'investissement et à soutenir les Canadiens, tout en préservant les avantages fiscaux pour l'immobilier et les PME.
