# BridgeTerm TAIGR PORTAL

AI THAT MEETS THE TRANSLATION NEEDS OF YOUR ENTIRE ORGANIZATION

TAKE BACK CONTROL OF YOUR ORGANIZATION'S TRANSLATIONS

The BridgeTerm TAIGR Language Portal will revolutionize how your organization manages its translation needs. TAIGR offers a secure, professional and fully integrated solution that prevents employees from using free online applications to translate potentially confidential documents.

PROBLEMS SOLVED

TAIGR puts an end to three major challenges faced by language services departments.

- **Compromised confidentiality:** Employees copy and paste sensitive text into online tools, putting your confidential data at risk.

- **Inconsistent terminology:** Generic machine translation engines don't know your specific terminology, creating inconsistencies in your communications.

- **Inefficient processes:** Professional translators often hastily revise machine translations without access to the original documents.

A COMPREHENSIVE PORTAL FOR EVERYONE

- **Text segment translation:** Copy-paste text into a simple interface and get an instant translation.

- **Document translation:** Upload files directly to translate them in full.

- **Smart translation:** Get multiple versions of the same translation (direct or stylized), then choose the one that best suits your needs.

- **Interactive chat:** Communicate with AI to refine your translations until you achieve the perfect result.

- **Advanced language tools:** Access dictionary and thesaurus functions.

KEY BENEFITS

- **Total security:** Keep all data in your controlled environment, eliminating risks associated with external cloud services.

- **Regulatory compliance:** Comply with strict data protection requirements.

ADVANTAGES

- TOTAL SECURITY: YOUR DATA REMAINS IN YOUR CONTROLLED ENVIRONMENT
- CONSISTENT TERMINOLOGY: LEVERAGE YOUR GLOSSARIES AND TRANSLATION MEMORIES
- MULTIPLE TRANSLATIONS: GET SEVERAL OPTIONS AND CHOOSE THE BEST ONE
- INTUITIVE INTERFACE: EASY TO USE FOR ALL EMPLOYEES
- SEAMLESS INTEGRATION: COMPATIBLE WITH YOUR EXISTING INFRASTRUCTURE
- UNIVERSAL ACCESS: AVAILABLE TO YOUR ENTIRE ORGANIZATION VIA A WEB PORTAL
- COMPLIES WITH STRICT CONFIDENTIALITY REQUIREMENTS
- CENTRALIZED CONTROL: MANAGEMENT OF ACCESS AND RESOURCES BY DEPARTEMENT
- RISK ELIMINATION: NO MORE UNSECURED "ON-THE-FLY TRANSLATIONS"
- NEAR-PROFESSIONAL QUALITY: SUPERIOR RESULTS COMPARED TO FREE ONLINE TOOLS

- **Consistent terminology:** Leverage your existing language resources (translation memories, glossaries, etc.) for perfectly tailored translations.

- **Intuitive interface:** Benefit from a platform that's as easy to use as online services, but much more powerful and private.

- **Superior results:** Get professional-quality translations tailored to your context.

- **Multiple options:** Choose from several proposed versions of a translation.

- **Promotion of your work:** Showcase your terminological and linguistic resources to the entire organization.

- **Streamlined process:** Eliminate unnecessary back-and-forth related to machine translation revisions.

- **Centralized management:** Control each department's access and resources.

INTEGRATION AND DEPLOYMENT

The TAIGR portal integrates seamlessly with your existing infrastructure.

- **Flexible installation:** Deploys on your server or in your private cloud environment.

- **LogiTerm connectivity:** Automatically leverages your existing bitexts, full-text databases and glossaries.

- **Enterprise authentication:** Supports SSO/MFA standards for secure access.

- **Customization by department:** Available language resources can be adapted to the needs of each department.

BRIDGETERM TAIGR PORTAL

ABOUT TAIGR

TAIGR represents the next generation of artificial intelligence-assisted translation. Unlike traditional machine translation, which provides a single fixed response, TAIGR offers different versions of the same text and draws on your existing language resources to enhance its suggestions. This approach reinserts translators back into the process, as they can now evaluate, compare and refine the most appropriate output. It can also help employees with occasional needs who would otherwise have turned to generic and insecure online services.
