TAIGR PLUGIN

ARTIFICIAL INTELLIGENCE INTEGRATION

Embrace the sophistication of AI with Azure AI, OpenAI, TAIGR Vault, Anthropic, Perplexity, Gemini or any other model that offers inference. The Prompt Manager lets you give precise instructions to your model. Retrieval augmented generation (RAG) allows the AI to consult your terminology and archives to generate more relevant translations. You can also indicate the context of the translation in a single click.

Artificial Intelligence Integration

OPTICAL CHARACTER RECOGNITION

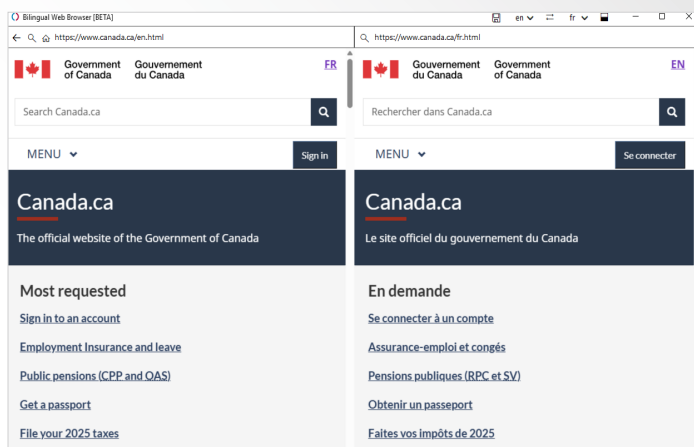

Is the text you need to translate in an image file? No problem! Paste the image into the **plugin** and watch as it is converted into editable text.

TEXT TO SPEECH AND SPEECH TO TEXT

Save time and perfect your output by letting the **plugin** transcribe your words or read text out loud.

BILINGUAL WEB BROWSER

The **plugin** comes with a web browser that lets you consult a website in two languages simultaneously, saving an incredible amount of time.

Bilingual Web Browser

WEB EXTENSION MODULE INTEGRATION

Does your client use LogiTerm? Configure the **plugin** to display their modules.

TRANSSEARCH INTEGRATION

The **plugin** can also show results from the TransSearch concordancer. TransSearch (subscription required) provides access to thousands of bitexts from public bodies such as the House of Commons of Canada.

EASY CONFIGURATION

It takes just minutes to link the **plugin** to your accounts. Say goodbye to lengthy logins and complicated VPNs!

TAILORED PROFILE MANAGEMENT

Do you work for multiple clients that require different resources and logins? The **plugin** lets you create customized profiles for each client that you can switch between in no time!
